Professional Summary

As a passionate and results oriented Individual, I am seeking an opportunity to begin my career as a data analyst. I possess a strong foundation in data analysis tools such as Excel, Tableau, Power BI, SQL, Google Looker Studio and as well, experienced in performing data visualization and reporting.

Hard Skills

- Proficient in using excel for data cleaning, analysis, visualization and creating compelling dashboards.
- Experienced in using SQL for large dataset.
- Skilled in creating visualizations with Power BI and Tableau.
- Proficient in working with Google workspace and Microsoft office suite.
- Ability to work collaboratively in a team environment.
- Strong communication and problem skills with attention to details.

Projects

Coffee Shop Sales Dashboard (Excel)

- Cleaned and prepped data.
- Used excel pivot table/charting tools to summarize and analyze the data.
- Created an interactive dashboard to visualize core business KPIs and define key metrics.

Students Performance Analysis (Excel)

- Analyzed how grades vary across different assessments or student groups.
- Used VLOOKUP to link detailed student information and created a dashboard showing, tests, projects and final exam scores of all the student. The analysis is tailored to gain insight into student's performance.

HR Analytics Dashboard (PowerBI)

- Data cleaning and modelling was done.
- Used Power BI's built-in visuals to represent metrics.
- Designed the dashboard to be visually appealing and informative.
